Automate an E-Commerce Web Application screenshot
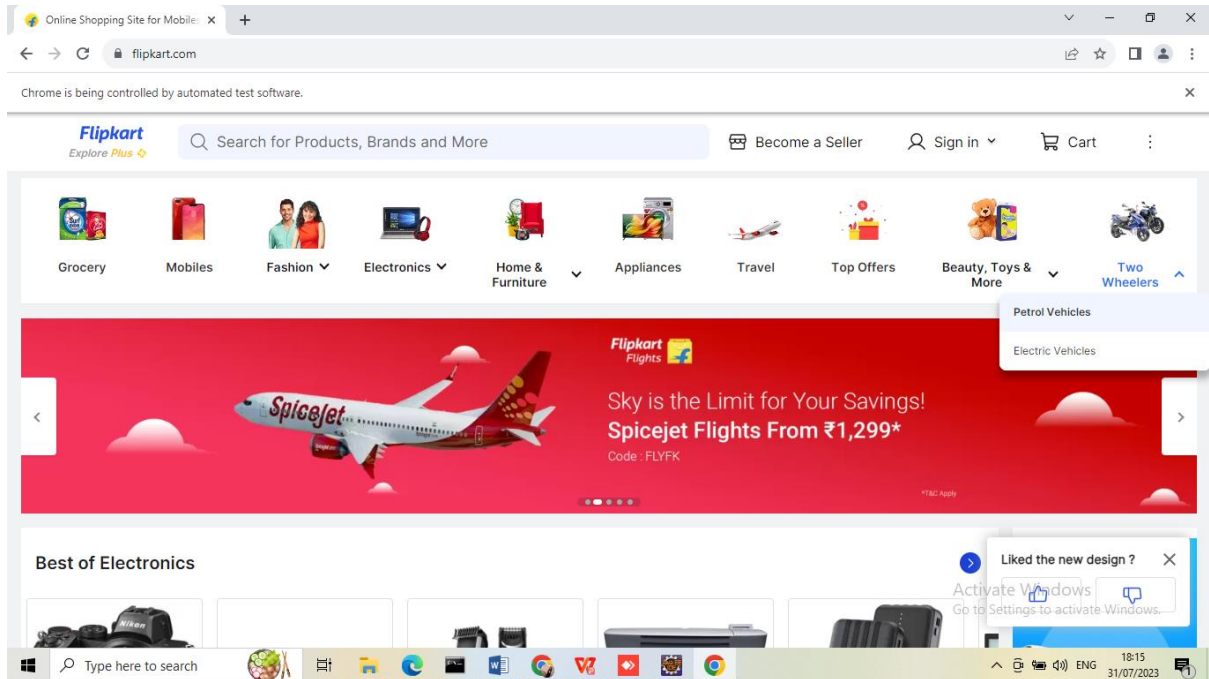

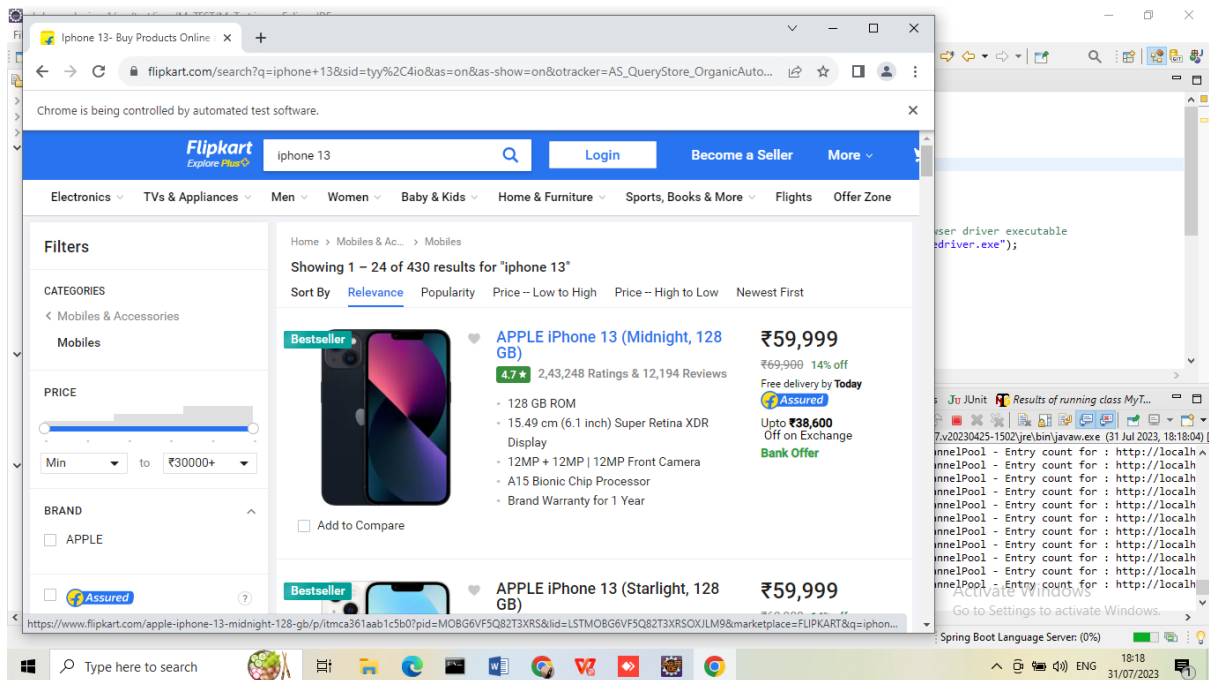

- Navigate to the Flipkart homepage (https://www.flipkart.com/)

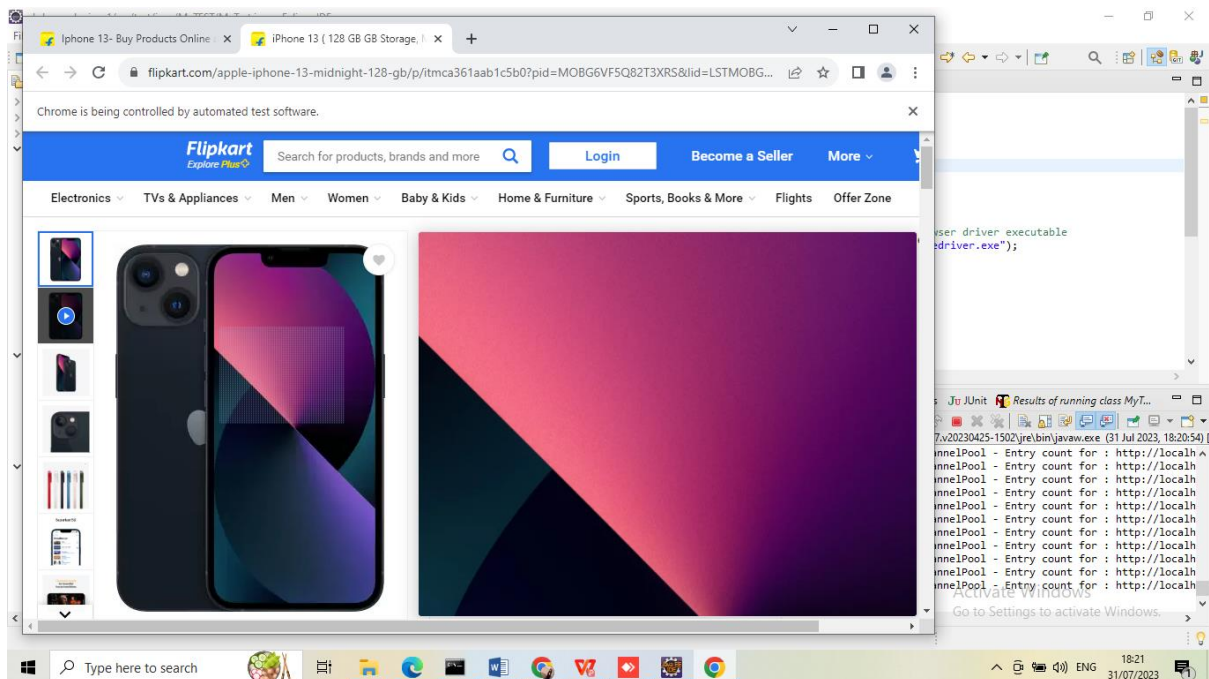

- Determine a page load time with a performance test
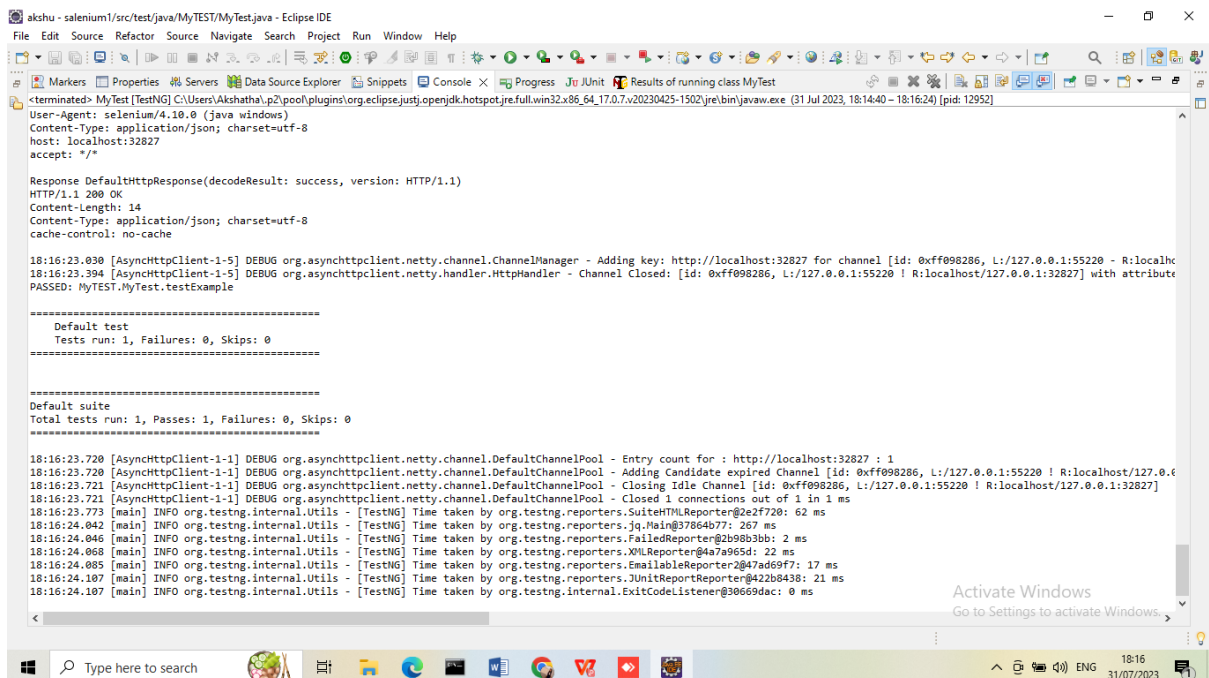

- Search for a product, say, "iPhone 13" under the "Mobile" category

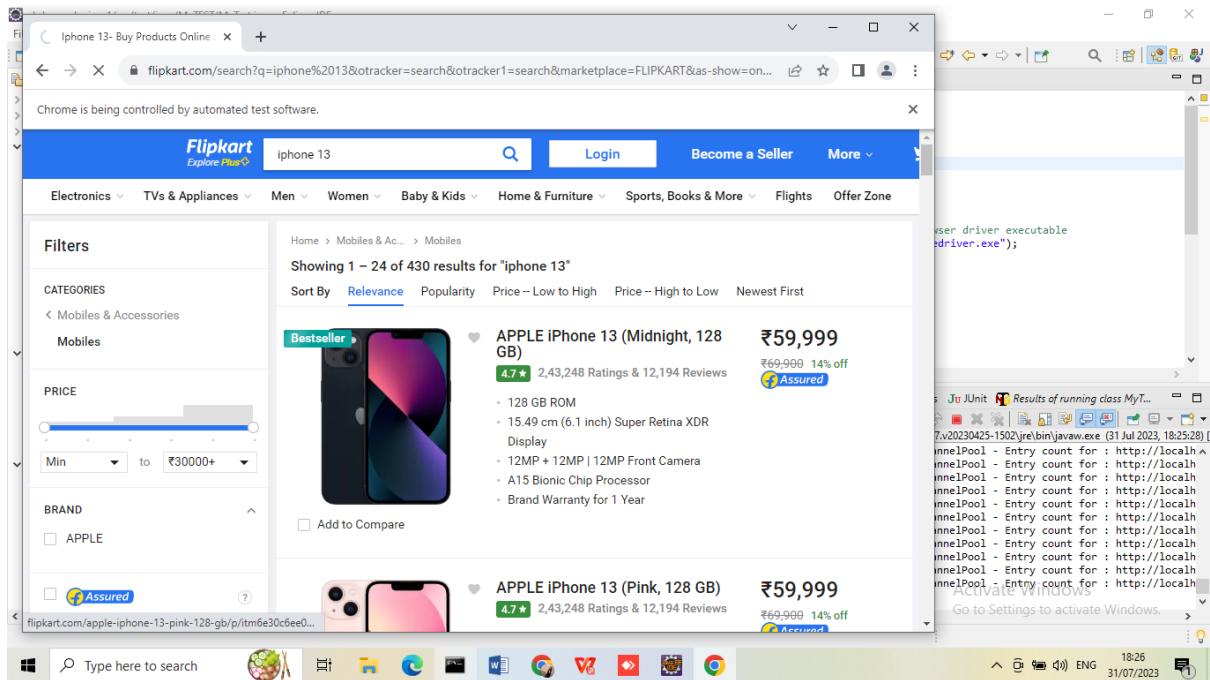

- Check if the images are loaded and visible till the screen height only
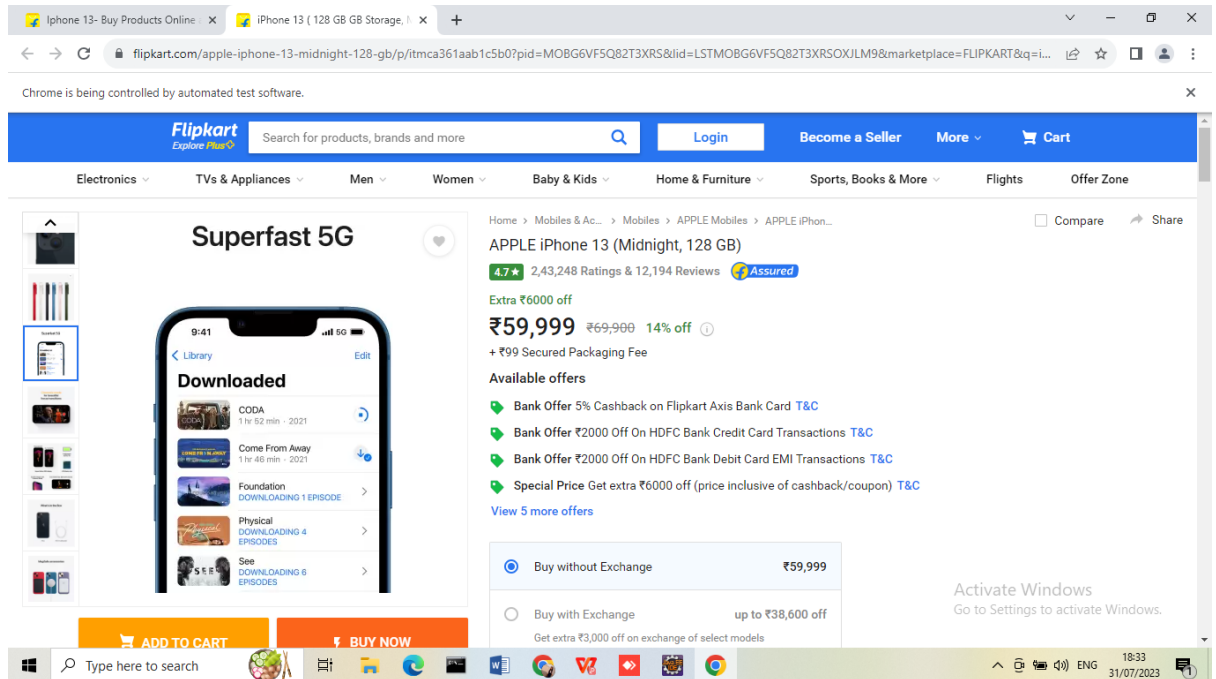

- Check if the page has a scroll feature

- Check the frequency at which the content will be refreshed while scrolling
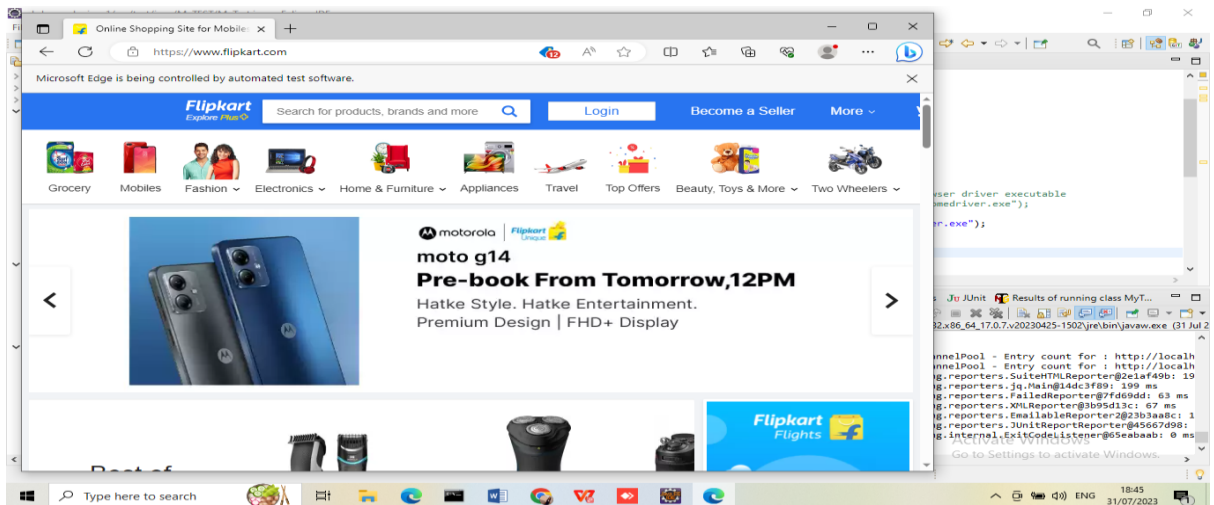

- Verify that the image is downloaded just before the user scrolls to its position and gets displayed in time

- Verify that it navigates to the bottom of the page

Check whether different browsers and screen resolutions render it the same way

Test cases pass
